

## **Problem description:**

This app is targeted at users who want to constantly lookup for the information about the movies, tv shows and actors. This app tries to fill in for a constant urge to check out websites for relevant information. This app a compact UI which can be display a lot of information at a single place.

## **Notes:**

The app will be ultimately published on the play store. Active development is going on make it better by implementing various caching algorithms. The current version of the does not make use of the Lru cache which can reduce the memory consumption. Thus the UI is a bit sluggish. The addition of a search functionality is going to give the users complete freedom on what information they want to consume.
